

# ZEITSCHRIFT FÜR NATURFORSCHUNG A

A Journal of Physical Sciences

Ed. by Martin Holthaus

## Objective

*A Journal of Physical Sciences: Zeitschrift für Naturforschung A (ZNA)* is an international scientific journal which publishes original research papers from all areas of experimental and theoretical physics. Authors are encouraged to pay particular attention to a clear exposition of their respective subject, addressing a wide readership. In accordance with the name of our journal, which means “Journal for Natural Sciences”, manuscripts submitted to *ZNA* should have a tangible connection to actual physical phenomena. In particular, we welcome experiment-oriented contributions.

Manuscripts considered for publication in *A Journal of Physical Sciences: Zeitschrift für Naturforschung A* undergo high-level refereeing. Mere formal correctness of a paper is not sufficient for its acceptance. Moreover, articles reporting a merely marginal extension of already existing knowledge are considered unsatisfactory. Instead, the key quality a publication in *A Journal of Physical Sciences: Zeitschrift für Naturforschung A* should possess is that it makes a genuine contribution to the advancement of its topic.

## Topics

- ▶ Atomic, Molecular & Chemical Physics
- ▶ Dynamical Systems & Nonlinear Phenomena
- ▶ Gravitation & Cosmology
- ▶ Hydrodynamics
- ▶ Quantum Theory
- ▶ Solid State Physics & Materials Science
- ▶ Thermodynamics & Statistical Physics

## Article formats

Original research articles, research notes, letters and review articles from all areas of theoretical and experimental physics
